

ABSTRACT

SYSTEM AND METHOD FOR CLOSING A TANK OPENING

5 System for sealing an opening of a plastic tank with a multilayer structure by means of a plate, itself constituted by a multilayer polymer structure compatible with the wall of the tank.

 Method for sealing such a tank by welding a plate with a multilayer structure
10 compatible with the external wall of the tank. One of more accessories can be attached to the plate and inserted into the tank.

 Utilization of the method to seal a fuel tank for a motor vehicle.
